

ACT Sirius 1 linked with Telex puts the world at your finger-tips

This new facility greatly simplifies the task of sending telexes. By connecting direct to the standard Telecom telex line the Sirius can prepare, send and receive telexes automatically.

Eliminating all of the drudgery and frustration typically associated with telex communications (no more punch tape, no more noise etc.) the Sirius controls the job. Now the user of a microcomputer can enjoy the facilities previously found only on a dedicated telex

message switching computer without interrupting normal procedures. Yes, this software runs in the "background" and does not interfere with traditional "foreground" tasks, such as word processing, payroll, financial modelling etc.

These are just a few of the features and benefits of this unique system. For further details or a demonstration, please contact us by telex or clip off the corner of this advert and attach it to your letterhead or business card.

Test drive the Victor desktop computer designed for systems.

Like a high performance automobile, the Victor desktop business computer needs to be put to the test to be really appreciated. Here's why:

The computer dilemma.

Systems houses today face a basic dilemma when it comes to selecting a computer.

The so-called "personal" computers on the market are like "economy" cars. They're relatively inexpensive but have limited power and capacity.

And the larger mini computers offer more power and speed, like a luxury car, but are, of course, more expensive.

Victor has a solution to that dilemma.

The Victor 9000 Business Computer is retail priced under \$5,000. If you sell computer systems, quantity purchase agreements will let you be very aggressive.

The Victor gives your systems the kind of memory and storage capacity advanced applications demand. Much more than comparably priced machines.

And the Victor display screen has double the resolution and capacity of its competitors. You can display a full 132-column report and still be perfectly readable. Is that important to your system? Ask any programmer.

Experience where it counts.

But those are only the technical advantages of the Victor 9000. Equally important is Victor's 65 years of experience in solving business problems. And Victor's 50 branch offices throughout the country providing fast service and total support.

Software tools to keep you growing.

Victor supplies CP/M-86 and MS DOS with every machine. Runtime support

for Basic, Cobol, Fortran and Pascal is no extra cost. The Victor 9000 has the tools you need to do the job right.

The Victor 9000. It's a desktop system computer designed to be a "cut above" the rest. Whether you sell complete systems, or are just looking for the best computer to support your software, call your Victor OEM specialist today. Or get in touch with Victor at (800) 621-5559. In Illinois (800) 972-5858. We're open 24 hours a day, 7 days a week.

VICTOR 9000

Meglio nel vostro business
che in quello dei vostri concorrenti.

In America si producono centinaia e centinaia di modelli diversi di computer. Ma appena noi della Iret Informatica abbiamo visto Victor 9000 abbiamo capito che era il computer più adatto per soddisfare le richieste del mercato italiano. E lo abbiamo importato. Victor ha una memoria di 128 Kb espandibili a 896 Kb per gestire ogni tipo di problema. La doppia unità di memorizzazione può gestire fino a 2,4 milioni di byte, ciò significa più informazioni su clienti e fornitori oltre ad archivi di magazzino più grandi e maggiori biblioteche di testi per il

word processing. Ma Victor vi fa anche risparmiare subito, perché i sistemi operativi CP/M-86 e MS-DOS, di cui è equipaggiato, permettono di accedere a tutti i linguaggi e alla ricca biblioteca di programmi applicativi disponibili. Victor vi offre quindi tutto quello che può darvi un micro-computer al prezzo di un personal. Venite subito a vedere come Victor può rendere, da domani, più profittevole il vostro business. Victor, it's a serious computer.
