

**THE VICTOR 9000 BUSINESS COMPUTER
VICTORWRITER WORD PROCESSING SYSTEM**

THE VICTOR 9000 VICTORWRITER WORD PROCESSING SYSTEM GIVES YOU FOUR POWERFUL PROGRAMS IN ONE

Victor brings you a whole new dimension in word processing, a software system which can do so much, self-teaching programs require you learn its 60 commands or less.

VICTORWRITER PROGRAMS INCLUDED

TEACH

The on-screen, on-disk program which is so easy to learn even temporary employees can become productive in 10-15 minutes.

EDITOR

This is one of the most complete, multi-featured word processing programs available today. It offers automatic editing, memory, flexibility and precision — all the operators in the business take advantage.

SLIPSPINELL

This program creates and displays types and integrated words in seconds. ADRS has growth points — because new words can continuously be added to its multi-themed word vocabulary.

MAKES PAGES

This program provides remarkable flexibility in mailing — under management and direct mail control. It includes having the assistance of an operator mailing service — for Merge-Print sends copies to each name in your database, automatically changing the address lines and information, and then, last, some personal addresses within the copy. Then it prints out mailing labels to match — finally doing the entire job.

YOUR OPERATORS WILL ENJOY WORKING WITH EASY-TO-REMEMBER SIMPLE KEY COMMANDS

With VictorWriter, operators will have to learn one simple manual instead, they learn right from the screen...at their own pace. Commands are simple as:
T to TEACH
E to EDIT
J to JUDGE
C to CHASE a new document
F to FIND
P to PRINT
T to TEACH

ON-SCREEN HELP IS ALWAYS AVAILABLE

VictorWriter incorporates a single key command, H for HELP. When

operator is in the middle of composing a document and can't remember how to move a block of copy, just simply key in the letter H for HELP and H for MOVE. Instructions automatically displayed on the screen and work proceeds without interruption.

VICTORWRITER'S SLIPSPINELL PROGRAM PREPARES THE EN- TIRE DOCUMENT

Whether it's a letter, contract, report, proposal, memo, price list, or brochure — it's never so problem. Four operators key in the letter T and the entire document is prepared, top to bottom. Any words that don't appear in Slipspinnell's word vocabulary are picked out and displayed in alphabetical order right on the screen. While word's correct, it can be instantly added to Slipspinnell's vocabulary with a type or tapping, the Make Make will automatically search the entire document for each occurrence of that word in seconds.

COPT CAN BE REPLACED OR CONNECTED THROUGHOUT ANY DOCUMENT

MotorWriter often puts you "glued to placement." For instance, the desktop program, an individual line from the quickly referred to as "Desktop" when his notes come in "Desktop". Your operator hits the key for RPL/ACE. The desktop is "Desktop/Desktop". The entire document is searched and corrected — without repositioning of necessary.

MASSIVE MAILINGS BE- COME AS SIMPLE AS A SINGLE LETTER

The Merge Print program of MotorWriter keeps track of mailing lists whether the source is a personal address book or database of names long. Your operator types just one version of a letter — and on command, MotorWriter will send copies to each name on the list, automatically changing the address, salutation, and any first name usage in the body copy. Merge Print does the mailing, right down to printing out mailing labels.

ALTOGETHER, THE VICTORWRITER WORD PROCESSING SYSTEM CAN STREAMLINE FOUR DAY-TO-DAY OFFICE OPERATION

For all those operations right at the fingertips of your operator. They can also appear, copy, create, delete, display, edit, cross, format, "go to", help, insert, justify list, locate, move, name, print, quit, run, spell — and much more.

MotorWriter takes care of all the details — from automatic page numbering and subsetting to the automatic insertion of whole sentences, paragraphs, or pages of standard language often found in contracts, letters, or form letters.

With a learning time of 30 minutes or less, you can introduce "the office of the future" and improve staff morale as your operator experiences a world of new productivity and unparalleled productivity.

**DO IT — WITH VICTOR
BUSINESS PRODUCTS**

VICTOR 9000 THE DESKTOP BUSINESS COMPUTER SYSTEM

The Victor 9000 is a fully integrated computer system designed for business applications. Priced like a personal or home computer, the Victor 9000 has capacity which rivals more expensive mini computers. It is built up in the more desktop than a typewriter.

Here's why the Victor is the more computer for your business.

***More storage capacity**

The 9000 standard hard drive, single-plated disk system has a capacity of 100MB for 1.2 million bytes.

***Dual format CRT display**

The Victor display screen has a high resolution matrix which can display both a standard 80-column format and an expanded 132-column format.

***A growing software library**

Victor has designed a complete software library to meet your every day business needs, plus programs for specific vertical business applications.

***Human engineering for ease of operation**

The Victor display monitor controls for left and right and tilt forward and backward for optimum viewing ease. The keyboard is free-standing and can be placed for maximum comfort and convenience.

***Two standard operating systems — at no extra cost**

The Victor 9000 comes with both CP/M-86 and MP-86B options for operating the powerful Intel 80286 microprocessor.

***Experience where it counts**

With over 30 years of experience in solving business application problems, you can depend on Victor for service and support when you need it.

VICTOR®

Serving American Business for 65 years.
